

Kingspan Environmental Accredited Installers April 2010

Drainology are pleased to announce that we have been appointed an Accredited Installer of all Kingspan Environmental Products.

To become an Accredited Installer, Kingspan use a selection process which assesses a company's installation expertise, reputation and financial status – so when using us you can be confident that our work will be second-to-none.

We have been recognised for our capability of installing, to a very high standard, all types of Kingspan Environmental products, such as Sewage Treatment Plants, Septic Tanks, Grease Traps, Cess Pits and Package Pump Sets.

Kingspan Environmental brings together the market leading brands within the off-mains drainage sector, including Entec (formerly Titan Pollution Control) - of which we have been Accredited Installers of for several years.
