

September 2006 - CHAS Accredited

For the second year running, we are pleased to announce that we are CHAS accredited (Contractors Health and Safety Assessment Scheme). The annual review ensures that all the companies registered and accredited by CHAS still fulfil all the criteria necessary to qualify.

Therefore, by remaining accredited, it proves that as a company we continue to implement and maintain the very highest health & safety standards; making sure our sites are a safe place for both our staff and our customers.
